

World Leader in Sophisticated Packaging Systems**MS2TP** Manual Side Drive 2 Top Tapehead**series overview**

The BestPack® MS2TP Series carton sealer is operator-fed and adjustable. It is designed to lay two strips of tape on the top of the carton. This becomes necessary where the major flaps do not meet in the middle of the carton, and the cost of staples is not acceptable. This series sealer eliminates all together the need for staples on the top of the carton.

All systems incorporate our exclusive pop-out pressure sensitive "High Speed" tape heads with patented tab adjustment. These units are also available in Stainless Steel.

major features
