30" W x 40" L
Seal Area

- For large items such as posters, picture frames, etc.

Your Choice of 4 Seal Systems

Nichrome Wire

Teflon Coated "Micro Knife"

Teflon Coated Hot Knife
Polyolefin/Polyethylene

Teflon Coated Hot Knife
Mushroom - PVC

- **Stainless Steel Film Clamps** assure both sheets of film are flat on seal pad releasing all tension from seal ensuring a strong seal everytime.

- **Stainless Steel Compensator Assembly** allows operator to adjust wire or micro knife temperature, unit compensates for residual heat in wire from previous cycle. Precise control of heat means consistent seals every cycle.

- **Power Belted Product Discharge Conveyor**, automatically transfers product into Shrink Tunnel.

- **Dual Magnetic Arm Hold Down** ensures positive even seal pressure to assure strong seals everytime.

"We looked at the competition and the Preferred Pack machine was far ahead in quality and features."

- **Dual Seal Head Return Cylinders** provide smooth seal head action. No bouncing.

- Seal Timer /
- On /Off Power Switch
- Discharge Conveyor

- Heavy Duty Locking Castors

Model PP2028-MK
One of Our Most Popular Models

Stainless Steel Frame Construction

PP1622MK-A Air Operated

"Being a contract packager we own several different L'Sealers and never know what size or type of product we will be running. Our Preferred Pack sealer will cycle faster and gives us stronger seals than any of our other machines. All of our operators want to run the Preferred Pack Machine."
